

# 電力系統

產品名稱	變電站CRP 網路元件	類別/產品編號	系統更新/PC-005
------	-------------	---------	-------------

用途/功能說明：變電站各保護電驛盤內PLC間主要以單模光纖HUB為主軸並經由AUI與多模光纖接頭與設備連接進行通訊，因此設備共有四大項:AUI光纖轉換器、光纖HUB、光纖轉網路、AUI HUB。

規範需求：

Product	Description
OM1001E	fibre optic to 1000BASE-SX, 850nm MM, c/w universal AC adapter (LTIPS-5-2U)
OM124	22 port fibre optic hub, c/w AC supply, without SFP modules
SFP-100FX	SFP module, 100BASE-FX
OM101-AUI	AUI-fibre

照片說明：

The diagram illustrates a network topology. At the top, three 'Device 1' units are connected to three 'AUI Fiber Converter' units. These converters connect to a central 'Fiber HUB' with ports labeled CH1 through CH6. The Fiber HUB is connected to an 'AUI HUB' (MODEL: ET3007S-E) and an 'AUI HUB' (MODEL: ET3007S-E). Below the AUI HUBs are 'AUI HUB' and 'AUI HUB' units. The AUI HUBs connect to 'Device 4', 'Device 5', and 'Device 6'. A red box highlights the 'AUI HUB' and 'AUI HUB' units. Below the diagram are images of 'AUI Fiber Converter' (MODEL: ET3007S-E), 'TOSHIBA FIBER HUB' (MODEL: TOSMAAP HUBR3003), and 'AUI HUB' (MODEL: ET3007S-E) components.

The photograph shows a server rack with multiple shelves. The top shelf contains a 'TOSHIBA FIBER HUB' (MODEL: TOSMAAP HUBR3003). The middle shelves contain 'AUI HUB' (MODEL: ET3007S-E) and 'AUI HUB' (MODEL: ET3007S-E) units. The bottom shelf contains an 'AUI HUB' (MODEL: ET3007S-E) and an 'AUI HUB' (MODEL: ET3007S-E) unit. The rack is filled with yellow and blue cables.
